

Once in a lifetime, true greatness is manifested.

We're on the brink of impacting the planet's future like never before.

COUNTDOWN: T-MINUS . . . 00:00:00

We are discovering how to COMMAND GRAVITY itself.

We have matched it with a new Economic Architecture compatible with the future it envisions, where all App clouds are connected into one internetworked cloud.

Enabling billions of people to create their own clouds.

For generations to come. . . .

The *wheel took us* from village to village. The *combustion engine took us* from town to town. The *wing took us* from continent to continent . . .

Now, *Propellant-free Propulsion can take us* from world to world, in a fraction of the time limited by present theories.

This potential breakthrough in advanced physics has been quietly developed, carefully engineered and rigorously tested in our labs, for nearly two decades.

In other words, advanced technology that could whisk you to the Moon by lunch, thrust you to Mars by dinner, and then deliver you safely back home to Earth by the next morning.

"WANNA TAKE A RIDE?"
